

Joel's Wiki Notes

- **Wiki Notes**
- **Linking between Notes, Names and Works, binding data fragments together to assist with comprehending a complete project.**
 - Bidirectional links permit rapid movement between elements of a project.
- **Continuation notes while writing that can be linked in a chain.**
- **In Notes, smashing is better than parentheses.**
- **Hilite 2000 is very handy for removing spaces or adding parens.**
- **Does not like to have ampersand in smashed title.**
- **Templates do not need to be in the same folder.**
- **When launching packages, the name of the icon is not necessarily the name of the package.**
 - Gesturing across the word 'backlight' toggles it.
 - NextLink, ContinueNote, NextPage
 - Prompts for the creation of a new note with an incremental note title.
 - Need templates for types other than plain notes.
 - Gesturing across NewtWikiOrphanedList generates a note with a list of all the notes whose titles aren't referenced by a link. No title, no entry.
- **Link types:**
- **Notes:**
 - SmashedWords
 - NewtWikiOrphanedList
 - NextPage
- **Packages:**
 - pkg:Names or pkg:(Names) or pkg:"Names"
- **Works:**
 - works:NewtWiki040ReadMe
 - works:(NewtWiki040ReadMe)
 - works:"NewtWiki051ReadMe"
- **Names:**
 - name:(Mr. Wayne Grundy)
- **Dates:**
 - date:IPIAGM (Creates new Meeting with str.)
- **Newton Books: (How are users to find the isbn?)**
 - isbn:NP:2231766J
 - pkg:7031165
 - NP:699929J
- **Specials:**
 - NewtWikiOrphanedList
 - NextPage
